Education

Guru Govind Singh Educational Society's Technical Campus Expected Graduation: June 2027
Bachelor of Technology in Computer Science & Engineering

St. Augustine's Day School March 2021 – April 2023
Secondary High *Percentage: 82%*

Projects

Talk To Document - RAG Project (Spring Boot, Hibernate, Maven, llama.cpp, REST API):
A full-stack Retrieval-Augmented Generation (RAG) application that enables users to upload, organize, and query documents using semantic search and LLM-powered question answering.

- Implemented document ingestion using Apache Tika with custom text chunking, vector embedding generation using Gemma-300M-BF16 and custom Qdrant and llama.cpp REST API handling.
- Integrated semantic retrieval using Qdrant and LLM-based query refinement and answer generation with Qwen2.5-Coder-3B-Instruct.
- Achieved accuracy over 90%.

https://github.com/anonymous6291/talk_to_document

AI Agent - Local LLM Automation (Java, Maven, llama.cpp, REST API):
AI-powered agent that converts natural-language instructions into executable system actions using Java, llama.cpp, and Qwen2.5-Coder-3B-Instruct.

- Integrated Telegram Bot API to execute commands and transfer files remotely.
- Password-based authentication and user blocking, significantly reducing unauthorized access.
- Implemented user permission based command execution, reducing arbitrary and destructive command execution by 100%.

https://github.com/anonymous6291/AI-Agent

SecureVault - Encrypted Password & File Manager (Java, Swing, Cryptography, Maven):
A cross-platform encrypted vault for securely storing files, passwords, API keys, and directories using modern cryptographic techniques with configurable lockdown and self-destruct mechanisms.

- AES-256-GCM encryption and PBKDF2-HMAC-SHA256 key derivation for file, password, and API Key storage.
- Achieved up to 4× faster bulk file processing using Java Virtual Threads and Executors while supporting 500+ concurrent file operations.
- Designed a vault-key architecture, that allows password rotation in < 1s , independent of vault size.

Skills

Languages: Java (Core & Advanced), Python, C, SQL

Frameworks / Libraries: Spring Boot, Hibernate, Tika, Swing, llama.cpp

Databases: Postgres, Qdrant

Tools: Maven, Git, GitHub, IntelliJ IDEA

Concepts: RAG, AI Agents, LLM Deployment, REST API, Concurrency, Cryptography, DSA

Operating Systems: Linux, Windows

Achievements

- Winner — BIT Sindri CodeQuest 2026
- GATE 2026 Qualified
- Solved 1100+ LeetCode problems (Java, C, C++, Python)
